

We cordially invite people who have been affected by the stigma of mental illness to contribute their valuable experience to planning the 20th anniversary celebration of MAD Pride in Australia

MAD is an acronym that stands for either *Making a Difference* or *Movement Against Discrimination*. MAD Pride is an international movement aimed at removing the stigma of mental illness. Although statistically, mental illness is common and widespread – particularly mental health distress and trauma – there is still stigma attached. Together, we can help to dispel the myths.

We would love to hear from anyone who has the availability to help out at a future event, and particularly those with skills and experience in event management, for the purpose of putting together the 20th-anniversary celebration – looking back – and shaping direction for the future – looking forward. If you would like to register your interest, please complete the section below and hand or email to one of our volunteers.

Tentative Date 24/25 November 2023 Tentative Venue Randwick Town Hall

Thank you for your support. Together, we can make a difference

Yes! I would like to be involved in planning an event for the Mad Pride 20th anniversary celebrations.
